## Network Installation

### Installing Software to a Network

The software has been designed to be easily installed and licensed on a network. You can get technical support on 07889 827687.

### Procedure

1. Install the software from your CD ROM onto your server and licence that copy using your key disk.
2. On your CD ROM is a client installation. Install this software (its a flash install and should be quick) on your proposed clients.
3. Create a link from your client machine to your server executable (EXE).
4. Thats it !

If you need any further help please call Dave Weatherall on 07889 827687 or email [support@dalesoftware.co.uk](mailto:support@dalesoftware.co.uk).
